

## Pegasus Scout Network

### Subs, expenses and claiming rules.

#### Subs

We're a charity and a self-financing part of the district. To those who attend regularly, we ask that they pay a small charge each month to help finance our activities. This is currently £2.50 a month, equivalent to £30 for the full year. For those who do not attend regularly there is no requirement to pay, but contributions to the running of the account are greatly appreciated.

#### Expenses and claiming rules

At present Network members do not need to pay national capitation and this is not requested by county or district. Stanley's Own Scouts allow us free use of their Explorer Den in exchange for maintenance jobs around the HQ. This is covered in the partnership agreement.

When running Network evenings, sometimes there is a cost involved for purchasing materials. This can be done and the money claimed back from the Network account.

To do so you must first contact the treasurer (Lucy) first. This allows us to ensure we have enough money in the account to reimburse you and it allows us to check the money is being used on something suitable for us to pay you back.

Any purchase over £25 will need approval from the District Scout Network Commissioner (Steven).

#### How we use the funds

The following are commitments we have made in the past and, pending the ever-changing financial situation, we intend to honour.

- Scout Network uniform badge (RRP 70p), free for any member of Scout Network.
- Moving On Award Explorers-Network (RRP 70p), free for any member who moved up from the Explorer Scout section or Explorer Scout Young Leaders.
- Pegasus Scout Network name tapes (£9.75 for 36), free for any member of Scout Network.
- Membership awards, Hampshire and New Forest North uniform badges (collective cost approx. £2 per set), free for any new member of Network who does not have another uniformed role (e.g. adult volunteer).
- Scout Network scarf (£5 per scarf, minimum order of 20), charged at a 50% discount or free for those who heavily support the running of Network.
